

The original source of the energy.

FOSSIL FUELS

GLOBAL WARMING

Use less.
Walk/cycle/public transport
Keep houses cooler

Coal, oil and natural gas.

ELECTRICITY IS NOT A FUEL BECAUSE . . .

Plants and animals that were trapped in mud and rock millions of years ago.
store energy and release the energy when they are burned.

Generating electricity using heat from hot rocks underground.

SUSTAINABLE NON-RENEWABLE FUELS

Generating electricity using heat or light energy from the Sun.

An energy resource that will never run out.
Solar, wind, tidal, hydroelectric, geothermal and biomass.
